DETAILED ACTION

Acknowledgments

1. This office action is in response to the reply filed on August 29, 2008.
2. In the reply, the applicant amended claims 1-10 and added new claims 11-20. Claims 1-20 are pending in the application.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. **Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Pedersen et al. (US 6,355,004) ("Pedersen").**

Pedersen discloses: a catheter assembly and method comprising a container 4, a catheter handle 10 and at least one catheter element 1 with a proximal end adapted for insertion into the urinary canal and an opposite distal end, the container having a cavity 5 adapted to accommodate at least a proximal section of said catheter element, said catheter handle adapted to be interlocked with said catheter element Fig. 5 and including a sleeve section adapted to surround a portion of said container Fig. 7, the handle is configured to be detached from the catheter element and from the container, Fig. 4.

The catheter handle is adapted to be attached to said container assembly Fig. 1 and is shorter than said container or shorter than said catheter element, Fig 7.

The distal section of the catheter element has at least one protruding part and the proximal compartment of the cavity has a distal opening zone with a radially inwardly extending exclusion means adapted to exclude the distal section of the catheter element from entering the proximal compartment, see element 6 and Figs. 1, 6-7.

At least a part of the distal opening zone of the cavity is flexible C4 L27-29.

The catheter assembly further comprises a lubricating medium C5 L66-C6 L4, a hydrophilic coating C5 L4-11 and sealing means 11 for sealing the cavity.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
